Professional Summary

Full-Stack Developer building web interfaces with React and Next.js and REST APIs with Go and PostgreSQL. Developed DEH, a digital agency website with English/Arabic content, package management, JWT authentication and image uploads.

Technical Skills

Frontend: React, Next.js

Backend & Data: Go, Chi, PostgreSQL, pgx, REST API, SQL Migrations, Internationalization

Authentication & Delivery: JWT, Refresh Token Rotation, bcrypt, File Upload Validation, Docker, Docker Compose

Projects

DEH - Digital Experience Hub: Delivered DEH as a freelance full-stack project, building the Next.js frontend and a Go REST API with Chi and PostgreSQL. Implemented English/Arabic package content, standard and custom package CRUD, OMR/USD pricing, JWT authentication with refresh-token rotation, and image uploads with file-type and size validation. Structured the backend into handler, service and repository layers, with SQL migrations and Docker Compose for the API and database. (React, Next.js, Go, Chi, PostgreSQL, REST API, JWT, Docker, Docker Compose)
