Professional Summary

React Native engineer with 7+ years of experience across mobile and web development. Delivered Android and iOS applications for digital signing, connected devices and offline workflows, including native integrations in Java and Swift. Collaborated remotely with English-speaking teams on hourly USD contracts, most recently developing Expo applications.

Technical Skills

Mobile & Frontend: React Native, Expo, TypeScript, JavaScript, React, Android, iOS

Native & Data: Native Modules, Java, Swift, TanStack Query, React Navigation, REST APIs, OpenAPI, WatermelonDB, SQLite

Quality & Delivery: Jest, Firebase Crashlytics, Firebase Performance Monitoring, Google Play Console, App Store Connect, Microsoft CodePush

Professional Experience

Grow / BeyondGrow | React Native Developer (Contract) / Remote 2026 - 2026

- Owned the entire mobile app design and worked with an English-speaking team to implement Grow in React Native and Expo, coordinating tasks in Notion.
- Implemented 3 sign-in methods (email, Google and Apple), account recovery and session restoration, isolating cached data by account and role.
- Built coach search, paginated results and identity verification; added recovery for offline saves and interrupted uploads with API regression tests.

Veloura | React Native Developer (Contract) / Remote 2026 - 2026

- Connected venue maps, partner filters and synchronized location cards in an Expo travel app, preserving navigation and scroll position between maps and venue details.
- Introduced in-app guides, stories and author profiles; redesigned paginated discovery to preserve cached content when refresh requests failed.
- Added 23 automated regression tests covering discovery, cache isolation and account/payment flows; prepared feature-flagged trip-planning and event-notification previews for review.

Dp-Lamp | Senior React Native Engineer / Remote (Emirate of Sharjah) Jan 2024 - Apr 2025

- Redesigned the app interface with the team, migrated JavaScript to TypeScript and upgraded React Native to 0.75.
- Resolved QR-code, firmware connection and Wi-Fi network discovery failures to restore device setup and connectivity.
- Built Java and Swift native modules for Wi-Fi/TCP device control; diagnosed crashes and managed Android and iOS releases.

Emzano | Senior React Native Engineer / Tehran May 2022 - Nov 2023

- Owned end-to-end React Native implementation of Emzano within the project team, coordinating work in Notion.
- Integrated authentication and digital-certificate SDKs via Java/Swift modules, enabling PDF signing for Tejarat Bank.
- Implemented root/emulator detection and runtime security checks; managed Android and iOS releases.

Taghvim | Senior React Native Engineer (Project-based) / Remote (France) Jan 2021 - Mar 2022

- Built a React Native calendar and notes app with Android ViewPager and iOS UIPageViewController for native page transitions.
- Used WatermelonDB for offline storage, resolved navigation/data-update bottlenecks and added Jest unit tests.

Behpardazan | React Native Developer / Tehran Jan 2019 - Nov 2021

- Developed React/React Native commerce, delivery and messaging apps; maintained framework upgrades, Firebase crash monitoring and CodePush updates.
